Different structures
Different focus
Different locations
Different strategies
Different discipline profiles

But we all do the same thing

A process model

Describes what the organisation does independent of strategy, structure, location or events - the model stands the test of time.

The centrepiece of the organisation's process architecture and a key EA tool.

The model facilitates communication across the organisation and the sector.

It is:
- Conceptual
- Independent
- Primitive
- Stable
- Integrative
- Useful

How do you represent what your organisation does?

Develop your version and use it as a framework for

New approaches to risk management and continuous improvement

Refining organisational structures

Drawing attention to the 'main game'

Conveying complexity

Communicating in a common language

Establishing a Strategic Application

PlanPortfolio Management

Creating opportunities for real enterprise wide change

Core Processes
The organisation’s raison detre

Enabling Processes
Processes that support realisation of core processes

Planning Processes
Strategic and operational planning and review processes

Governance Processes
Influencing processes e.g., policy related, compliance, legislative/regulatory

A Structured Approach to Workplace Productivity, Renewal and Reform
