

## Contents

<b>Adaptive management of natural resources</b>	
Catherine Allan.....	1
<b>Waterway rehabilitation – Shays Creek</b>	
Luke Austin.....	7
<b>Estimating sediment loads in Great Barrier Reef catchments: balance between modelling and monitoring</b>	
Rebecca Bartley, David Post, Anne Kinsey-Henderson and Aaron Hawdon .....	13
<b>A riparian categorisation strategy for urban drainage channels in Gold Coast City</b>	
Kendall Bott .....	19
<b>Water and conflict resolution: from smoke filled rooms to public participation</b>	
Kathleen Bowmer.....	25
<b>Science to support water sharing planning in New South Wales</b>	
Kathleen Bowmer, Phillip Eberbach, Tom Murphy and Eddie Harris.....	31
<b>The first decade of water resource planning in Queensland: What have we learned about environmental flows?</b>	
Sandra Brizga .....	37
<b>Alluvial gully erosion in Australia’s tropical rivers: a conceptual model as a basis for a remote sensing mapping procedure</b>	
Andrew Brooks, John Spencer and Jon Knight.....	43
<b>Determining end-point goals and effective strategies for rehabilitation of coastal wetlands: examples from the Burdekin River, North Queensland</b>	
Damien Burrows and Barry Butler.....	49
<b>Real-life management of an environmental water reserve – a Wimmera perspective</b>	
Hugh Christie.....	55
<b>An evaluation of Waterwatch activities in West Gippsland, Victoria</b>	
Tammy Dawson and Bob Goodbourn.....	61
<b>Development and implementation of the Maroochy Waterways Management and Rehabilitation Plan</b>	
Steve Dudgeon, David Moore and Mick Smith .....	67
<b>Honeysuckle Reservoir decommissioning</b>	
Christopher Dwyer .....	73
<b>What's stopping the water? Identifying influences on environmental water releases in the Wimmera</b>	
Fiona Dyer, Ben Dyer, Heinz DeChelard and Greg Fletcher .....	79
<b>River restoration based on natural channel characteristics: how to develop restoration designs for different rivers and riparian plant communities</b>	
Wayne Erskine, Michael Saynor and Gary Fox .....	85
<b>Considered data arrangements for effective and holistic catchment management</b>	
Paul Fennell and Michael Jensz.....	91

<b>Community wetland monitoring in the South Australian Murray-Darling Basin</b> Adrienne Frears and Tracey Steggle	97
<b>Challenges faced in the integration of science in river management in Australia</b> Kirstie Fryirs, Mick Hillman and Alexandra Spink	103
<b>Audit and remediation of fish passage barriers in coastal NSW</b> Matthew Gordos, Scott Nichols, Cameron Lay, Anthony Townsend, Charlotte Grove, Simon Walsh, and Craig Copeland	109
<b>Key ingredients for the successful implementation of riparian rehabilitation programs</b> Lori Gould	115
<b>Prediction of fluvial seed dispersal and long-term sustainability of riparian vegetation using sediment transport processes</b> Jeremy Groves, Gary Caitcheon, Richard Norris and David Williams	121
<b>What is ‘environmental water’?</b> Mark Hamstead	127
<b>Conserving freshwater ecosystem values in Tasmania, Australia: identification and application of freshwater conservation management priority areas</b> Danielle Hardie and Peter Davies	133
<b>The impact of fine sediment accumulation on benthic macroinvertebrates: implications for river management</b> Evan Harrison, Richard Norris and Scott Wilkinson	139
<b>Uncertainty in diffuse source pollution assessment and mitigation options – who knows?</b> Alexander Herr and Petra Kuhnert	145
<b>Valley chokes in the upper Wimmera River catchment are playing key roles in mitigating the threats of erosion – a model case study</b> Martin Hillemacher and Brian Seymour	151
<b>Do stakeholder committees produce fair policy outcomes?</b> Jonathon Howard	157
<b>Ecological condition and biodiversity value of urban riparian and non-riparian bushland environments: Ku-ring-gai, Sydney</b> Christopher Ives, Mark Taylor and Peter Davies	163
<b>Market-based incentives: A consumer’s experience of participating in River Tender</b> Rick James and John Paul	169
<b>Using phenology of eucalypts to determine environmental watering regimes for the River Murray floodplain, South Australia</b> Anne Jensen, Keith Walker and David Paton	175
<b>New generation models for catchment modelling: developments in the eWater CRC</b> Phillip Jordan, Robert Argent and Rory Nathan	181
<b>Connectivity of stream water and alluvial groundwater around restoration works in an incised sand- bed stream</b> Annabelle Keene, Richard Bush and Wayne Erskine	187

<b>Boundary shear stress distribution in meandering compound channel flow</b> Kishanjit Kumar Khatua and Kanhu Charan Patra.....	193
<b>Large-area, high-resolution remote sensing based mapping of alluvial gully erosion in Australia's tropical rivers</b> Jon Knight, John Spencer, Andrew Brooks and Stuart Phinn .....	199
<b>Planning for action: the evolution from state-wide priorities to local work sites</b> Veronica Lanigan and Stuart Pengelly .....	205
<b>Developing appropriate incentives for improving water quality in the Burdekin River catchment</b> Allyson Lankester and Romy Greiner .....	211
<b>Are all river reaches created equal? Identifying erosion hotspots for catchment management</b> Rebecca Lett, Bruce Abernethy and Henry Chaplin .....	217
<b>Connecting the community to waterways through stories</b> Rachel Lopes .....	223
<b>Relationships, resources and results: Reflections on experiences in building capacity for improved river and riparian management</b> Siwan Lovett and Philip Price .....	229
<b>Using remote sensing to map wetland water clarity and permanence: approaches for identifying wetlands requiring management in large catchments</b> Leo Lymburner, Damien Burrows and Barry Butler.....	235
<b>The identification and assessment of water quality hazards in the Leichhardt River, Mount Isa, Queensland</b> Alana Mackay, Tabitha Kuypers and Mark Taylor .....	241
<b>Predicting Ecological Responses for Improved Stream Management</b> Nick Marsh, Sylvain Arene and Ralph Ogden.....	247
<b>River and catchment restoration prioritisation tools</b> Nick Marsh, Simon Linke, Ralph Ogden, Paul Wettin and Peter Cottingham.....	254
<b>Anabranch management on a regulated reach of the Murray River</b> Julian Martin and Dean Judd.....	259
<b>Is new policy evidence based - and is it working?</b> Jim McDonald .....	265
<b>Can the 'triple bottom line' concept help organisations respond to sustainability issues?</b> Michael Mitchell, Allan Curtis and Penny Davidson.....	270
<b>Greening Australia river recovery outcomes in rural Northern Tasmania</b> Michael Noble and Sebastian Burgess .....	276
<b>Setting ecological targets for river systems: a framework to support multi-stakeholder groups</b> Ruth O'Connor, Susan Nichols, Peter Oliver, Richard Norris and Bill Johnson.....	282
<b>Assembly of geomorphic targets for stream rehabilitation - summary of a manual template</b> David Outhet and Carolyn Young .....	288

<b>A mouthful of mud: the fate of contaminants from the Fitzroy River, Queensland, Australia and implications for reef water policy</b>	
Robert Packett .....	294
<b>Optical dating of post-European settlement channel change: Gilmore Creek, southeastern Australia</b>	
Ken Page, Paul Frazier, Tim Pietsch and Remy Dehaan.....	300
<b>Finding integration pathways: developing a transdisciplinary (TD) approach for the Upper Nepean Catchment</b>	
Carolyn Palmer, Jacqueline Gothe, Cynthia Mitchell, Chris Riedy, Kate Sweetapple, Sally McLaughlin, Grant Hose, Marian Lowe, Heather Goodall, Trudy Green, Deepak Sharma, Simon Fane, Kerry Brew and Peter Jones .....	306
<b>Adaptive management for determining environmental flows in the Australian Capital Territory</b>	
Michael Peat and Richard Norris.....	312
<b>Dam threat to a decade of restoration of the Mary River, Queensland</b>	
Glenda Pickersgill, Steve Burgess and Brad Wedlock.....	318
<b>Are waterways with willows wider?</b>	
Lizzie Pope, Brian Finlayson and Ian Rutherford .....	324
<b>Magnitude of response: selecting sites for monitoring vegetation response to environmental flows</b>	
Jane Roberts and Fiona Dyer.....	330
<b>Public investment in waterway management in Victoria, Australia</b>	
Simon Robertson .....	336
<b>Sediment sources in the Lake Burragorang catchment and their management</b>	
Paul Rustomji and Scott Wilkinson.....	342
<b>City people eat rivers: estimating the virtual water consumed by people in a large Australian city</b>	
Ian Rutherford, Amelia Tsang and Siao Khee Tan .....	348
<b>Managing sources, sinks and transport of natural contaminants in regulated rivers: a case study in the Murrumbidgee River catchment, NSW</b>	
Darren Ryder, Sue Vink, Nerida Bleakley and Adrienne Burns .....	354
<b>Assessing the health of Tasmanian rivers: collecting the evidence</b>	
Johanna Slijkerman, James Kaye and Fiona Dyer .....	360
<b>Sediment supply from small upland catchments: possible implications of headwater channel restoration for stream management</b>	
Hugh Smith and Deirdre Dragovich.....	366
<b>Towards an objective approach for a regional - continental scale geomorphic river classification</b>	
John Spencer, Andrew Brooks and Jon Knight.....	372
<b>An interdisciplinary perspective of riverwork projects in the Upper Hunter Catchment, NSW: has river rehabilitation begun?</b>	
Alexandra Spink, Kirstie Fryirs, Gary Brierley and Kate Lloyd.....	378
<b>Testing specific stream power thresholds of channel stability with GIS</b>	
Mark Stacey and Ian Rutherford .....	384

<b>Regional hydraulic geometry models for Queensland streams</b> Sunil Tennakoon and Nick Marsh .....	390
<b>Waterwatch – An integrated capacity building initiative</b> Don Thomson .....	395
<b>Hydraulic geometry in river channel networks as a method for the assessment of river condition</b> Elizabeth Thornton, Melissa Neave and Scott Rayburg .....	401
<b>Trialling different low cost methods of water hyacinth removal in tropical coastal wetlands</b> Vern Veitch, Damien Burrows and David Hudson .....	407
<b>Managing flow for geomorphic form: Erosion and accretion of river benches</b> Geoff Vietz, Ian Rutherford, Michael Stewardson and Brian Finlayson.....	413
<b>Biofilm and flow regimes: developing a biological monitoring program for the Nymboida River, northern NSW</b> Emilie Warner, Darren Ryder, Andrew Boulton and Barbara Downes.....	419
<b>Sediment and nutrient generation rates for Queensland rural catchments – an event monitoring program to improve water quality modelling</b> Dave Waters and Robert Packett .....	425
<b>Translating science into practice: Is ‘best practice’ the best option?</b> Justine Watt and Michael Jenz.....	431
<b>Challenges for improving the science underpinning river restoration practices</b> Robyn Watts .....	437
<b>Effects of plantation forest harvesting on water quality and quantity: Canobolas State forest, NSW</b> Ashley Webb, Brad Jarrett and Lisa Turner .....	443
<b>Environmental flows and ecological health of the lower Wimmera River</b> Anne-Maree Westbury, David Tiller and Leon Metzeling.....	449
<b>Examining ‘inclusiveness’ in adaptive natural resource management</b> Deirdre Wilcock .....	455
<b>Monitoring of remediation works to arrest stream degradation in an agriculture-dominated catchment</b> Andrea Wilson, Robyn Watts, Ken Page and Remy Dehaan .....	461
<b>Aquatic macroinvertebrates in urban waterways: comparing ecosystem health in natural reference and urban streams</b> Ian Wright, Peter Davies, David Wilks, Sophia Findlay and Mark Taylor .....	467
<b>Which confluences should we use to differentiate stream segments for management? A geomorphic assessment</b> Elisa Zavadil, Michael Stewardson, Anthony Ladson and Ian Rutherford .....	473
<b>Author Index</b> .....	479
